

Habitat Series Cabin on Wheels

Freedom Meets Functionality

The Cabin on Wheels is designed for people and projects that need mobility without sacrificing comfort. Built on an RV-style chassis, it provides the warmth and feel of a wooden cabin while remaining fully transportable. Its smart interior layout maximises space with clever storage, efficient appliances, and a comfortable living area, delivering the full experience of a tiny house on a mobile platform.

This model is especially suited for hospitality operators, temporary housing, or private users who need a high-quality structure without committing to a fixed installation. Because it does not require permanent foundations, it can easily adapt to locations with strict building regulations. Whether used as a retreat, an additional rental unit, or seasonal accommodation, the Cabin on Wheels offers comfort, compliance, and long-term flexibility.

Key Highlights:

- Mobility-friendly structure (RV-style chassis)
- Wood-look exterior for a natural cabin appearance
- Highly efficient interior layout with smart storage solutions
- Options for off-grid energy independence
- CE-compliant electrical and fireproof core materials

Customisation Options:

- Choice of finishes and colours
- WC + Kitchen Pack
- AC and underfloor heating
- Solar panel integration
- Extra insulation upgrades

Note: the Cabin on Wheels can be offered with the trailer base or without. We recommend you check first with the authorities regarding regulations on trailers and required certifications

Technical specification

- Structural RV chassis engineered for stability
- High-efficiency insulation suitable for European climates
- Integrated bathroom and kitchen pack options
- Optional AC and underfloor heating
- Smart interior layout with integrated storage
- Road transportable, depending on local regulations
